Medical Certification: To Be Completed by Physician/Medical Examiner

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry must be supported by proper documentation, such as receipts or invoices. This ensures transparency and allows for easy verification of the data. The second part of the document outlines the procedures for handling discrepancies. It states that any differences between the recorded amounts and the actual amounts must be investigated immediately. The third part of the document provides a detailed explanation of the accounting system used, including the various accounts and the methods for calculating the final balance.

The following table shows the results of the audit. It lists the various accounts and the amounts recorded for each. The total amount recorded is compared to the actual amount, and the difference is shown. The table also includes a column for the date of the audit. The results of the audit are as follows:

Account	Recorded Amount	Actual Amount	Difference	Date
Accounts Payable	100.00	100.00	0.00	1/1/2020
Accounts Receivable	200.00	200.00	0.00	1/1/2020
Inventory	300.00	300.00	0.00	1/1/2020
Fixed Assets	400.00	400.00	0.00	1/1/2020
Liabilities	500.00	500.00	0.00	1/1/2020
Equity	600.00	600.00	0.00	1/1/2020
Total	1600.00	1600.00	0.00	1/1/2020

The results of the audit show that the recorded amounts are in agreement with the actual amounts. This indicates that the accounting system is working properly and that the records are accurate. The audit also identified some areas for improvement, such as the need for more frequent audits and the need for better documentation. The audit was conducted by the external auditor, who is independent of the company. The audit report is being provided to the management of the company for their review and action.
